used XDM when I used to download torrents on a 100mbps or less internet connection. I still use it, when the internet is slow. However, if you are connected to the internet at a high speed, I recommend you using something else. Because, since this download manager is limited, the other download manager on here can download

business work closely with the Italian-based pharmaceutical company on the development and manufacture of pharmaceutical and medical solutions. Given Tunisian positions in the pharmaceutical and biotech sector, says ABC chief executive Mohamed El Ouaouary, Tunisia is a logical and natural place to begin this partnership.

“We are seen as a good partner,” he says. “In Tunisia we are looking for synergies in terms of goods manufactured, regulatory compliance, logistics, transport. In terms of our state of the art translation services, in terms of medical languages, we are looking for a place where we can work closely with the pharmaceutical company.”

The company currently has a presence in Kenya, Mozambique, Tanzania, Zambia,

To date it has translated medical documents into more than 60 different languages, with a customer base of some 5 000 students. This is the company's first foray into the pharmaceutical sector, and it is currently

handling the translation of publications for the pharmaceutical company's various branches - including Europe. LAP owns three centres of excellence and ancillary laboratories in Italy, Brazil, Germany and Egypt and has also developed a global performance improvement business for medical testing, medical

education, biobanking and the pharmaceutical industry. With a legal team made up of 15 partners, ABC Translations, according to El Ouaouary, “is a multidisciplinary organisation, so we can easily provide ancillary services to companies, and fill the gaps that they might have in their strategy.” At this point he
